The Post Office Electrical Engineers' Journal

INDEX

VOLUME 63

(April 1970–January 1971)

PAGE NO.

A

Access to the Winter Hill Radio Station 57
Aerial, Measurements on Goonhilly 85 ft Diameter—Part 2—Profile Adjustment and Electrical Performance .. 20
All-Figure Numbers, Birmingham Area 195
Answering for Datel Services, Automatic Calling and Automatic 253
Anti-Jamming Device for Conveyor-Belt Systems, An .. 189
Auto-Manual Centres for London, New Generation of .. 212
Automatic Answering for Datel Services, Automatic Calling and 253
Automatic Calling and Automatic Answering for Datel Services 253

B

BACK, R. E. G., and WITHERS, D. J. The Development of the Intelsat Global Satellite Communications System—Part 2—Current Earth-Station Practice and Future Systems 1
BACKSHALL, G. C. New Duct for the Protection of Shore-Ends of Submarine Cables 218
BARTLETT, G. A., and WALKER, A. F. Telecommunications in Power Stations 38
Belfast (City) Exchange Conversion, Computer Record for 195
BIRCHBY, G., and MOXON, R. L. A New Concrete Tower for Purdown Radio Station 138
Birmingham Area—All Figure Numbers 195
Boilers, Retubing of Hot-Water 57
BOTT, A. J., and CASTLE, W. C. Automatic Calling and Automatic Answering for Datel Services 253
BOTT, A. J. Interfaces for Digital Data Transmission .. 113
Broadband Radio-Relay Links, Testing of 220
BRONSDON, E. G. Developments in Medium-Range Ship-to-Shore Radio Services 71

C

Cable Design, Some Principles of Local Telephone 164
Cable Pairs, Identification of New 177
Cable-Tube System, London 14
Cables for Schools Closed-Circuit Television Networks, Jointing Coaxial 29
Cabling on London Bridge 125
Call-Failure-Detection Equipment—Standard Equipment for Director and Non-Director Strowger Exchanges .. 152
Calling and Automatic Answering for Datel Services, Automatic 253
CASTLE, W. C., and BOTT, A. J. Automatic Calling and Automatic Answering for Datel Services 253
Character Storage for Automatic Error-Correcting Telegraph Systems, Stored-Program 33
Closed-Circuit Television Networks, Jointing Coaxial Cables for Schools 29
Coaxial Cables for Schools Closed-Circuit Television Networks, Jointing 29
College, The Post Office Technical Training 77
Computer Project, Long Lines 24
Computer Record for Belfast (City) Exchange Conversion .. 195
Concrete Tower for Purdown Radio Station, A New .. 138

PAGE NO.

Connexions in the Switched Telephone Network, Transmission Measurements of 97
Contacts in Telephone Exchanges: Contact Opening and Closing Phenomena and Quenching Techniques, Electrical Part 2—The Design of Contact Switching Circuits 179
Control and Supervisory Systems for Microwave Radio-Relay Links, Remote 169
Conveyor-Belt Systems, An Anti-Jamming Device for .. 189
CRAGGS, J. F. Identification of New Cable Pairs 177
CROOKS, K. R. A New Generation of Auto-Manual Centres for London 212
CROSS, B. The Long Lines Computer Project 24

D

Data Transmission, Interfaces for Digital 113
Data-Transmission Systems, A Line-Transmission Simulator for Testing 117
Datel Services, Automatic Calling and Automatic Answering for 253
Depreciation, Lives of Plant and 96
Design, Some Principles of Local Telephone Cable .. 164
Desk Unit, New 20-Line Key-and-Lamp 232
Detection Equipment—Standard Equipment for Director and Non-Director Strowger Exchanges, Call-Failure .. 152
Development of the Intelsat Global Satellite Communication System—Part 2—Current Earth-Station Practice and Future Systems 1
Developments in F.D.M. Transistor Line Systems 234
Developments in Medium-Range Ship-to-Shore Radio Services 71
Digital Data Transmission, Interfaces for 113
DOHERTY, M. A Land-Rover Mounted Winch 31
Duct for the Protection of Shore-Ends of Submarine Cables, New 218

E

Echo Suppressor No. 7A 86
Electrical Contacts in Telephone Exchanges: Contact Opening and Closing Phenomena and Quenching Techniques—Part 2—The Design of Contact Switching Circuits .. 179
Error-Correcting Telegraph Systems, Stored-Program Character Storage for Automatic, ... 33
Exchanges: Contact Opening and Closing Phenomena and Quenching Techniques, Electrical Contacts in Telephone—Part 2—The Design of Contact Switching Circuits .. 179

F

Failure-Detection Equipment—Standard Equipment for Director and Non-Director Strowger Exchanges, Call .. 152
Fast Signalling in the U.K. Telephone Network 242
F.D.M. Transistor Line Systems, Recent Developments .. 234
Flying Manhole 125
FOX, N. The Post Office Technical Training College .. 77

G

Gas Turbines for Telecommunications Power Plants .. 143

PAGE NO.

General Election 1970, London Television Outside Broadcasts 196
GIPP, J. A. L., and MILLER, J. R. Recent Developments in F.D.M. Transistor Line Systems 234
Goonhilly 85 ft Diameter Aerial, Measurements on—Part 2—Profile Adjustment and Electrical Performance .. 20
GROVES, K., and MACKRILL, P. A Line-Transmission Simulator for Testing Data-Transmission Systems 117

H

HEATHER, J. M., and MARTIN-ROYLE, R. D. Remote Control and Supervisory Systems for Microwave Radio-Relay Links 169
Highly Reliable Time-Pulse for Television Switching .. 8
HIX, K. W., and PYRAH, J. D. Call-Failure-Detection Equipment—Standard Equipment for Director and Non-Director Strowger Exchanges 152
HODSOLL, A. G. The Echo Suppressor No. 7A 86
HOLLAND, G. E. V., and LANDER, A. C. A Highly Reliable Time-Pulse for Television Switching 8
HORSFIELD, B. R. Fast Signalling in the U.K. Telephone Network 242
HUGHES, C. J., and JONES, G. T. Programmable Logic—A New Approach to Standardization 227
HUNT, C. S. Stored-Program Character Storage for Automatic Error-Correcting Telegraph Systems 33

I

Identification of New Cable Pairs 177
Improving Underground Maintenance Part 2—Proving a New Organization 11
Integrated Circuits, Metal-Oxide-Semiconductor (MOS) Part 2—Simple Logic Circuits 105
Intelsat Global Satellite Communication System, The Development of the—Part 2—Current Earth-Station Practice and Future Systems 1
Interfaces for Digital Data Transmission 113

J

Jointing Coaxial Cables for Schools Closed-Circuit Television Networks 29
JONES, G. T., and HUGHES, C. J. Programmable Logic—A New Approach to Standardization 227
de JONG, N. C. C. Progress in Postal Engineering. Part 1—A General Survey 65
Part 2—Packets and Parcels 131
Part 3—Letter Mail 203

K

Key-and-Lamp Desk Unit, New 20-Line 232
KYME, R. C. Lives of Plant and Depreciation 96

L

LAMB, W. H. The London Cable-Tube System 14
LANDER, A. C., and HOLLAND, G. E. V. A Highly Reliable Time-Pulse for Television Switching 8
Land-Rover Mounted Winch 31
LAWRENCE, J. L. A. A New 20-Line Key-and-Lamp Desk Unit 232
Leads on Electrical Appliances, Testing the Safety of .. 51
Letter Code-Sorting Installation, Move of 125
Lines Computer Project, Long 24
Line Systems, Recent Developments in F.D.M. Transistor .. 234
Line-Transmission Simulator for Testing Data-Transmission Systems, A 117
Lives of Plant and Depreciation 96
Local Telephone Cable Design, Some Principles of .. 164
Local Transmission Planning, A New Method of 84
Logic—A New Approach to Standardization, Programmable 227
London Bridge, Cabling on 125
London Cable-Tube System 14
London, New Generation of Auto-Manual Centres for .. 212
London Television Outside Broadcasts, General Election 1970 196
Long Lines Computer Project 24
LOWE, B. A., and PEARSON, H. E. Measurements on Goonhilly 85 ft Diameter Aerial—Part 2—Profile Adjustment and Electrical Performance 20

M

MACKRILL, P., and GROVES, K. A Line-Transmission Simulator for Testing Data-Transmission Systems 117
Maintenance, Improving Underground—Part 2—Proving a New Organization 11
Manhole, Flying 125
MARTIN-ROYLE, R. D., and HEATHER, J. M. Remote Control and Supervisory Systems for Microwave Radio-Relay Links 169
Measurements of Connexions in the Switched Telephone Network, Transmission 97
Measurements on Goonhilly 85 ft Diameter Aerial—Part 2—Profile Adjustment and Electrical Performance .. 20
Medium-Range Ship-to-Shore Radio Services, Developments in 71
Metal-Oxide-Semiconductor (MOS) Integrated Circuits—Part 2—Simple Logic Circuits 105
Microwave Radio-Relay Links, Remote Control and Supervisory Systems for 169
MILLER, C. B., and MURRAY, W. J. Transit-Trunk-Network Signalling Systems—Part 1—Multi-Frequency Inter-Register Signalling 43
Part 2—Multi-Frequency Signalling Equipment .. 91
Part 3—Line-Signalling Systems 159
MILLER, J. R., and GIPP, J. A. L. Recent Developments in F.D.M. Transistor Line Systems 234
Monitoring the Speed of Standby Engine-Generator Sets .. 157
MOORE, R. A. The Testing of Broadband Radio-Relay Links 220
MORTON, W. D., and REYNOLDS, F. H. Metal-Oxide-Semiconductor (MOS) Integrated Circuits—Part 2—Simple Logic Circuits 105
Move of Letter Code-Sorting Installation 125
MOXON, R. L., and BIRCHBY, G. A New Concrete Tower for Purdown Radio Station 138
MURRAY, W. J., and MILLER, C. B. Transit-Trunk-Network Signalling Systems—Part 1—Multi-Frequency Inter-Register Signalling 43
Part 2—Multi-Frequency Signalling Equipment .. 91
Part 3—Line-Signalling Systems 159

N

New Approach to Standardization, Programmable Logic .. 227
New Duct for the Protection of Shore-Ends of Submarine Cables 218
New Generating Sets at Reading Trunk Exchange 57
New Generation of Auto-Manual Centres for London .. 212
New Method of Local Transmission Planning 84
New 20-Line Key-and-Lamp Desk Unit 232

P

PEARSON, H. E. Gas Turbines for Telecommunications Power Plant 143
PEARSON, H. E., and LOWE, B. A. Measurements on Goonhilly 85 ft Diameter Aerial—Part 2—Profile Adjustment and Electrical Performance 20
Planning, A New Method of Local Transmission 84
Plant and Depreciation, Lives of 96
Postal Engineering, Progress in—Part 1—A General Survey 65
Part 2—Packets and Parcels 131
Part 3—Letter Mail 203
Post Office Standard Video Transmission Equipment .. 147
Post Office Technical Training College, The 77
Power Plant, Gas Turbines for Telecommunications .. 143
Power Stations, Telecommunications in 38
Press Notices 60, 130, 198, 264
Programmable Logic—A New Approach to Standardization 227
Progress in Postal Engineering—Part 1—A General Survey 65
Part 2—Packets and Parcels 131
Part 3—Letter Mail 203
Purdown Radio Stations, A New Concrete Tower for .. 138
PYRAH, J. D., and HIX, K. W. Call-Failure-Detection Equipment—Standard Equipment for Director and Non-Director Strowger Exchanges 152

R

Radio-Relay Links, Remote Control and Supervisory Systems for Microwave 169
Radio-Relay Links, Testing of Broadband 220
Radio Services, Developments in Medium-Range Ship-to-Shore 71
Radio Station, A New Concrete Tower for Purdown .. 138
Reading Trunk Exchange, New Generating Sets at .. 57
Recent Developments in F.D.M. Transistor Line Systems .. 234
Regional Notes 57, 125, 195, 260
Repair on a 1,400-pair Cable, Uni-Diamiter 196
Retubing of Hot-Water Boilers 57
REYNOLDS, F. H., and MORTON, W. D. Metal-Oxide-Semiconductor (MOS) Integrated Circuits—Part 2—Simple Logic Circuits 105
RIDOUT, P. N., and ROLFE, P. Transmission Measurements of Connexions in the Switched Telephone Network .. 97

PAGE NO.

ROLFE, P., and RIDOUT, P. N. Transmission Measurements of Connexions in the Switched Telephone Network .. 97

S

Safety of Leads on Electrical Appliances, Testing the .. 51
Satellite Communication Systems, The Development of the Intelsat Global—Part 2—Current Earth-Station Practice and Future Systems 1
SCOTT, W. L. Electrical Contacts in Telephone Exchanges: Contact Opening and Closing Phenomena and Quenching Techniques—Part 2—The Design of Contact Switching Circuits 179
Schools Closed-Circuit Television Networks, Jointing Coaxial Cables for 29
SELF, C. P. Jointing Coaxial Cables for Schools Closed-Circuit Television Networks 29
Semiconductor (MOS) Integrated Circuits, Metal-Oxide—Part 2—Simple Logic Circuits 105
Shore-Ends of Submarine Cables, New Duct for the Protection of 218
Signalling in the U.K. Telephone Network, Fast 242
Signalling Systems, Transit-Trunk-Network—Part 1—Multi-Frequency Inter-Register Signalling 43
Part 2—Multi-Frequency Signalling Equipment .. 91
Part 3—Line-Signalling Systems 159
Ship-to-Shore Radio Services, Developments in Medium-Range 71
Simulator for Testing Data-Transmission Systems, A Line-Transmission 117
SIXSMITH, J. Post Office Standard Video Transmission Equipment 147
Sorting Installation, Move of Letter-Code 125
Speed of Standby Engine-Generator Sets, Monitoring the .. 157
SPENCER, H. J. C. A New Method of Local Transmission Planning 84
SPENCER, H. J. C. Some Principles of Local Telephone Cable Design 164
Standardization, Programmable Logic—A New Approach to 227
Standby Engine-Generator Sets, Monitoring the Speed of .. 157
Stored-Program Character Storage for Automatic Error-Correcting Telegraph Systems 33
Submarine Cables, New Duct for the Protection of Shore-Ends of 218
Supervisory Systems for Microwave Radio-Relay Links, Remote Control and 169

T

Technical Training College, The Post Office 77
Telecommunications in Power Stations 38
Telephone Cable Design, Some Principles of Local .. 164
Television Networks, Jointing Coaxial Cables for Schools Closed-Circuit 29
Television Outside Broadcasts, General Election 1970, London 196
Television Switching, Highly Reliable Time-Pulse for .. 8
Testing of Broadband Radio-Relay Links 220
Testing the Safety of Leads on Electrical Appliances .. 51
THAIN, C. C., and WELLS, D. R. Improving Underground Maintenance—Part 2—Proving a New Organization .. 11
Time-Consistent Traffic Recording: Automatic Stop Facility 58
Time-Pulse for Television Switching, Highly Reliable .. 8
Tower for Purdown Radio Station, A New Concrete .. 138
Traffic Recording: Automatic Stop Facility, Time-Consistent 58
Training College, The Post Office Technical 77
Transistor Line Systems, Recent Developments in F.D.M. .. 234
Transit-Trunk-Network Signalling Systems—Part 1—Multi-Frequency Inter-Register Signalling 43
Part 2—Multi-Frequency Signalling Equipment .. 91
Part 3—Line-Signalling Systems 159
Transmission Equipment, Post Office Standard Video .. 147
Transmission Measurements of Connexions in the Switched Telephone Network 97
Transmission Planning, A New Method of Local 84
TRUE, J. S. Monitoring the Speed of Standby Engine-Generator Sets 157
Trunk-Network Signalling Systems, Transit—Part 1—Multi-Frequency Inter-Register Signalling 43
Part 2—Multi-Frequency Signalling Equipment .. 91
Part 3—Line-Signalling Systems 159
Tube System, London Cable- 14
Turbines for Telecommunications Power Plants, Gas .. 143

U

U.K. Telephone Network, Fast Signalling in the 242
Underground Maintenance, Improving—Part 2—Proving a New Organization 11
Uni-Diameter Repair on a 1,400-pair Cable 196

V

Video Transmission Equipment, Post Office Standard .. 147

W

WALKER, A. F., and BARTLETT, G. A. Telecommunications in Power Stations 38
WAY, V. G. W. Testing the Safety of Leads on Electrical Appliances 51
WELLS, D. R., and THAIN, C. C. Improving Underground Maintenance—Part 2—Proving a New Organization .. 11
Winch, A Land-Rover Mounted, ... 31
